

# Partner Profile

We thought it might be a good idea to show how our resellers are using Stinova products to deliver solutions to their digital signage customers.

## Electronic Art (USA)

Lead by the charismatic Tim Burke, Electronic Art is a full service interactive agency that specializes in the development of custom kiosk software, digital signage systems and integrated website development.

Electronic Art recently completed the installation of Stinova digital signage software at the Perfect North Slopes ski resort in Lawrenceburg, Indiana.

“Digital signage and Stinova software are a great fit for Perfect North,” said [Tim Burke](#), President of Electronic Art. “This system allows for virtually endless multi-media communication possibilities. The S-Cube IP multicast server will let them broadcast video from one source to multiple screens. For example, they could broadcast a live snowboarding competition happening outside to screens around the whole facility.
